

# Statement

07.04.2025

Dear representatives of Ireland,

Due to my line of work, generating ideas, projects and solutions - registering patents is an extremely expensive procedure. The average cost of a patent is €5,000 when I have a lot of different solutions, ideas and projects.

Therefore, I decided to protect myself and my activities with this statement:

Ideas, solutions, projects that are uploaded to cloud servers, saved in audio files or located on email clients are objects of interest for spies.

Therefore, any interaction or development of my ideas without my knowledge or participation is an activity that is clearly defined as espionage.

The Republic of Ireland, as a member state of the European Union, is a member of the EUROPOL structure. Europol, in turn, taking into account the composition of countries, interacts with Interpol, which actually ensures security for me and my activities around the world.

**I request that this statement be entered into the Garda, Europol and Interpol databases.**

I would also like to inform you that earlier, in an official format, full insurance was completed through the Pre-Trial Investigation Bureau of Ukraine.

**I would be happy to be of service to Irish society, economy and security.**

Sincerely,  
Oleksandr Mishcheriakov
